Summary of findings

Overall summary

Bromley Park Dementia Nursing Home is a care home that specialises in care and support for people living with dementia. The home can accommodate up to 38 people in single rooms. At the time of our inspection there were 35 people living at the home.

We found the following examples of good practice.

Arrangements were in place for relatives to visit the home safely in line with national guidance. This included screened visits and PPE provided to visitors. People were supported to speak to their families on the phone or via video call. The provider had introduced virtual consultations to reduce the need for external visitors to the home.

The provider was following best practice guidance to ensure visitors inside the home did not introduce and spread Covid19.

The provider had arrangements in place to test both people and staff for COVID-19, in line with the current guidelines on testing.

The provider had clear protocols for people who were infected with COVID-19, and for people who had been admitted to the home from hospital or the community. Staff were adhering to PPE and social distancing guidance.

Staff who were more vulnerable to COVID-19 were supported and risk assessed to ensure staff and people remained safe.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Bromley Park Dementia Nursing Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at the preparedness of care homes in relation to infection prevention and control. This was a targeted inspection looking at the infection control and prevention measures the provider has in place.

This inspection took place on 11 March 2021 and was announced.

Is the service safe?

Our findings

S5□ How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
