Summary of findings

Overall summary

Pelton Grange Care Home provides residential care for up to 47 people. At the time of our inspection there were 41 people living at the home.

We found the following examples of good practice:

The home had comprehensive policies and procedures to manage any risks associated with the COVID-19 pandemic. This included the management of people with a COVID-19 positive diagnosis.

People living in the home and their relatives were supported to maintain contact. When visitors were unable to access the home, for example if they tested positive for COVID-19 technology such as on-line visiting was utilised. Garden and window visits were also facilitated.

A programme of regular COVID-19 testing for both people in the home, staff, and visitors to the home had been implemented. All visitors, including professionals were subject to a range of screening procedures, including showing evidence of vaccination and a negative lateral flow test before entry into the home was allowed.

There was an ample supply of PPE for staff and any visitors to use. Hand sanitiser was readily available throughout the service. Staff had received updated training on the use of PPE and we observed staff wearing it correctly during our inspection. Clear signage and information were in place throughout the home to remind staff of their responsibilities.

Daily cleaning schedules were implemented by housekeepers and all staff were involved in undertaking touch point cleaning.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Pelton Grange Care Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 28 January 2022 and was announced. We gave the service two days' notice of the inspection.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

The provider was facilitating visits for people living in the home in accordance with the current guidance. Normally residents could nominate up to three visitors and also an essential care giver to support them to keep contact with family and friends. Visits were pre-booked to allow the home to manage visiting safely. As the home had residents testing positive for COVID-19 at the time of our site visit, they were only supporting in-home visits for essential care givers and visitors of those residents who were receiving end of life care. They were supporting other residents to keep in contact with family and friends through technology such as on-line visiting and by using garden and window visits.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The service was meeting the requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
